

Superior disinfection

A product for all areas

Evaluated as high-level disinfection

More environmentally adapted*

Superior effect

Safer working environment

Does not contain alcohol or chlorine

Documented effect

Virus / multi-resistant bacteria / yeast and mold / spores

Kills Corona within 30 seconds!

Proven effect against e.g:

Spores

- Clostridium difficile
- Bacillus subtilis, Bacillus cereus

Virus

- Poliovirus
- Adenovirus
- Murine norovirus (MNV), e.g. **winter vomiting bug** (Calicivirus)
- IPN Virus (Infectious Pancreatic Necrosis), salmonid fish viral infection
- Avian influenza virus (H10N7)
- Porcine parvovirus (PPV)
- **Coronavirus**

Parasites

Coccidia spp., Lepeophtheirus salmonis (laxlöss), Gyrodactylus salaris

Fungi & yeast

- Candida albicans
- Aspergillus brasiliensis (niger), e.g. **black mold**

Bacteria

- Enterococcus hirae
- Pseudomonas aeruginosa
- Escherichia coli (E-coli)
- Campylobacter jejuni
- **Salmonella** typhimurium
- Legionella pneumophila
- Aeromonas salmonicida (Furunculosis)
- Yersinia ruckeri (Redmouth)
- Klebsiella pneumoniae (ESBL)
- Enterococcus faecium (VRE)
- Acinetobacter baumannii
- Staphylococcus aureus
- **Listeria** monocytogenes
- Streptococcus equi
- Carnobacterium piscicola (Carnobacterium maltaromaticum)

Mycobacteria

Mycobacterium terrae, Mycobacterium avium

Biofilm

For more information, see the Microbiological Efficacy Summary.

The ideal disinfection solution:

Short contact time

LifeClean provides great time and cost savings due to its short contact time at maximum 2-5 minutes. LifeClean's contact time is shorter than the drying time.

Low concentration, yet effective

Stronger isn't necessarily better. Thanks to LifeClean being effective even at low doses, we succeed our vision of caring for the environment, humans and animals.

Broad spectrum

Unlike most disinfectants, LifeClean removes biofilm, prevents development of multi resistance and has a broad spectrum of kill.

User-friendly

A ready to use formula which is easy to use. No hazard pictograms because of the more environmentally adapted* abilities of LifeClean. Store in room temperature.

Proven efficacy

LifeClean is routinely tested at independent laboratories according to current EN standards. Our fulfilled EN standards insure our users of a truly effective protection when using LifeClean.

One product, one action. All areas, all materials.

LifeClean Disinfectant is an innovative, one action Disinfectant that cleans, disinfects and protects. LifeClean is the ideal disinfection solution.

The product

LifeClean is a disinfectant for surfaces and tools. LifeClean has a 100% disinfection effect and is evaluated as high-level disinfection.

LifeClean eliminates multi-resistant bacteria, spores, viruses yeast, mold and biofilm. In addition, LifeClean reduces unpleasant odors (eg from fish and urine), is very effective in wet environments and eliminates parasites (e.g. salmon lice and Coccidia).

LifeClean is a patented and stable disinfectant based on ClO₂. The product meets European EN standards and has undergone clinical testing by third-party institutes and laboratories.

Superior effect

LifeClean has proven effectiveness against Clostridium difficile, Bacillus subtilis, E. coli, Salmonella, Listeria, winter vomiting bug (Calici), Candida albicans, mold, viruses etc. A high-efficiency product for all areas is one benefit for employees, ensures a high hygiene level and is economically sustainable.

100% effective

- does not develop resistance

LifeClean destroys the genetic coding of RNA, which destroys DNA and prevents multiplication and resistance development. With LifeClean, there is no risk of developing resistance.

Effective against biofilm

LifeClean breaks down biofilms and eliminates microbes. Continuous use of LifeClean counteracts the construction of biofilms. As part of the product's unique composition, LifeClean also contains surfactants that provide a cleaning effect.

Short contact time

LifeClean reacts directly with the microbes that are eliminated quickly and efficiently. The extremely short contact time makes working procedures easier and time-saving.

2-5 min
contact
time

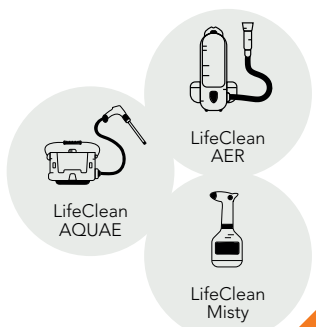

*More environmentally adapted

LifeClean is not classified as harmful. Effective in low concentrations. Breaks down to harmless and biodegradable residues.

Consists
of 99.6%
water

Apply LifeClean through, e.g:

- Trigger / spray
- Pump
- Pressure sprayer
- Microfiber cloth
- Fogging & electrostatic
- Central System
