

	DECLARATION OF CONFORMITY FOR PLASTIC MATERIALS WICH COME INTO CONTACT WITH FOOD
Composed of:	PP (polypropylene)
Advised conditions of storage:	Storage with the shelter from the sun and/or heat source and safe from moisture

1. Compliance

Comply with the current European regulation regarding:

- Regulation (EC) 1935/2004 of the European Parliament and of the Council of 27 October 2004 on materials and articles intended to come into contact with food and repealing Directives 80/590 / EEC and 89/109 / EEC.
- Commission Regulation (EC) No 2023/2006 of 22 December 2006 concerning good manufacturing practice for materials and articles intended to come into contact with food
- Commission Regulation (EU) No 10/2011 and its amendments (15th Amendment Reg (UE) 2020/1245
- Directive of the European Parliament and of the Council 94/62 / EC of 20 December 1994 on packaging and packaging waste.
- Resolution of the Council of Europe AP 89 (1) on the use of coloring agents in plastic in contact with food - only colored products.
- Standard EN 13431 for energy recovery

Products to which is referring this declaration, are meeting global migration limits according to Regulation 10/2011, in following testing conditions, and are compliant with test results.

	Food simulant	Contact conditions	Migration criterias (mg/dm ²)
Overall migration	10% ethanol	2h at 100°C	compliant
Overall migration	3% acetic acid	2h at 100°C	compliant
Overall migration	Olive oil (D2)	2h at 121°C	compliant
Specific migration	95% ethanol	10 days in 60°C	compliant
Specific migration	3% acetic acid	10 days in 60°C	compliant

Based on the declarations of raw materials producers we inform that we are using in production substances for which permitted specific limits migration SLM are determined in accordance with Annex I and II of Regulation (EU) No 10/2011: no metals and primary aromatic amines listed in Annex II of Regulation (EU) No 10/2011.

DECLARATION OF CONFORMITY
FOR PLASTIC MATERIALS WHICH COME INTO CONTACT
WITH FOOD

Composed of:	PP (polypropylene)
Advised conditions of storage:	Storage with the shelter from the sun and/or heat source and safe from moisture

➤ The following substances subjects to restriction, specific migration limits (SML):

Ref.N°	CAS N°	Substances	SML	Resultat
13380/25600/ 94960	77-99-6	1,1,1-trimethylolpropane	<0,6 mg/kg	compliant
38820	26741-53-7	Bis (2,4-di-tert-butylphenyl) pentaerythritol diphosphite	0,039 +/- 0,005 mg/kg	compliant
94560	122-20-3	triisopropanolamine	<0,002	compliant
95360	27676-62-6	1,3,5-tris(3,5-di-tert-butyl- 4-hydroxybenzyl)-1,3,5- triazine- 2,4,6(1H,3H,5H)trione	<0,5	compliant
39815	182121-12-6	9,9- bis(methoxymethyl)fluorine	<0,05	compliant

2. Information relative to the substances for which there are restrictions and/or dual use additives:

Adequate information on substances subject to restriction in food, obtained by experimental data or theoretical calculation about the level of their specific migration and - where appropriate - purity criteria in accordance with Directives 2008/60 / EC, 95/45 / EC and 2008 / 84 / EC to enable the user of these materials and articles comply with the relevant EU rules or - in their absence - national provisions applicable to food:

- No dual use additives substances were used for the production of the products to which this declaration refers to.
- Products meet the requirements of Directive 94/62 on packaging and packaging waste and heavy metal content and another amending directive. The sum of the concentrations of lead (Pb), cadmium (Cd), mercury (Hg) and hexavalent chromium (Cr VI) does not exceed 100 mg / kg. (Report of analysis)
- No primary aromatic amines listed in Annex II of Regulation (EU) No 10/2011.
- No Bisphenol A (n° CAS:80-05-7)/Bisphenol S (n° CAS:80-09-01)/Bisphenol F (n°CAS:620-92-8)

3. Requirements to use of material or product:

DECLARATION OF CONFORMITY
FOR PLASTIC MATERIALS WHICH COME INTO CONTACT
WITH FOOD

Composed of:	PP (polypropylene)
Advised conditions of storage:	Storage with the shelter from the sun and/or heat source and safe from moisture

- Products made of PP foil are intended to come into contact with any type of food,
- Usable temperature range for PP products is from -10°C to +80°C (for cold dishes) and -20°C to +120°C (for hot dishes). The products are intended for long-term storage at room temperature or below, including heating to 70 ° C for not more than 2 hours or heating up to 100 ° C for not more than 15 minutes.
- The contact surface / volume simulant 6 dm²: 1 kg of food
- Recommended storage temperature -10°C to +50°C

4. General statement:

- However, this guarantee does not extend to improper use of the materials and special exceptional properties of the packaged goods.
- The declaration takes effect starting from the date appearing below for a maximum duration of two years
- The declaration was issued on the basis of test results and based on the declarations of producers of raw materials and other materials used for production.
- The declaration cancels any former declaration.
- It will be modified when the mentioned regulations are modified. In particular it shall be renewed when substantial changes in the composition or production occur that bring about changes in the migration from the materials or articles or when new scientific data becomes available."
