

Anniversary Chair

Sverigestolen 820

The Sverigestolen chair first saw the light of day in 1975 and has, over the years, become one of our most popular and widely used work chairs. With its origins in driver seats for buses, trucks, forklifts, and more, it is well-proven in terms of comfort, ergonomics, and quality. Since its introduction in the 70s, development has not stood still; on the contrary, Sverigestolen has been complemented with various models and features to meet the market's demands and wishes.

As Be-Ge celebrates its 90th anniversary, another version is being launched: the Sverigestolen 820. This chair is designed and based on the best ergonomic and comfort features offered by the other chairs in the Sverigestolen series, providing a work chair suited for long and demanding sitting sessions.

In the fall of 2024, we are celebrating with a **promotional price** on the Sverigestolen 820 in the fabric Renewed Loop, which is 100% recycled from textile waste and recycled polyester. For us, it is a given to care for our world, climate, and environment in our products, how we manufacture them, and how we treat and act towards one another.

If the chair requires service or the replacement of a component after many years of use, you can purchase spare parts or have it repaired to continue using it for many more years. When the chair eventually reaches the end of its life and needs to be recycled, it can easily be disassembled into its components, which can then be recycled and reused.

With the Sverigestolen 820, you get a quality product with a 5-year warranty, one that will bring you joy for many years to come.

Facts

- » **Weight 20 kg**
- » **Seat tilt mechanism 16 degrees**
- » **Ergonomically designed seat**
- » **Standard aluminium base**
- » **Adjustable head rest**
- » **Height-adjustable and lockable tilt mechanism**
